INTERESTS

As a fullstack builder driven by digital transformation, I guide clients from prototype to production, leveraging modern web development and/or Excel-based automation.

CORE SKILLS

- Fullstack web development (React, Next.js, FastAPI)
- Advanced automation & expertise in Excel/VBA
- Database analysis and reporting
- Active listening and client relationship management
- Organization, facilitation, and team or workspace management
- Project planning, coordination, and follow-up
- Technical documentation and knowledge transfer

PROFESSIONAL EXPERIENCE

Junior Fullstack Developer & Senior Excel Consultant

2025 - PRESENT | FREELANCE

I build robust, modern, and tailored web applications from concept to production, with a strong focus on UX/UI and automation.

My Excel/VBA expertise complements my tech stack for advanced migration and automation solutions.
